look 5 : wool cut out detail coat development

CAUSER
DINO

look 5 : wool cut out detail coat process

each panel of the wool coat was cut and layered by hand

while considered, i responded to the contours of research imagery to create the shapes on each panel

CUT OUT PANEL PROCESS

after the top layer was cut and topstitches for security, i layered and drew the underneath cut out shapes

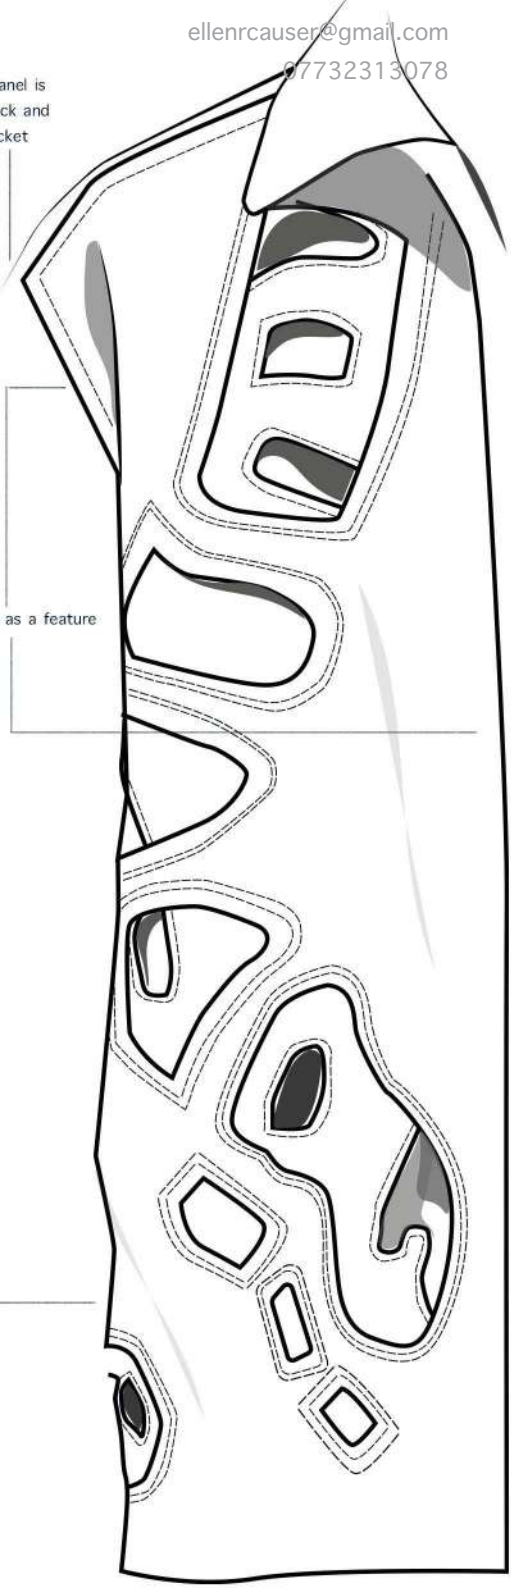

once drawn the shape was then stitched before the cut out for stability

the top and base layer were then pinned and topstitched together, giving a detailed double layered topstitch

the now secure layered panel is topstitched onto front, back and sleeve panels before jacket construction

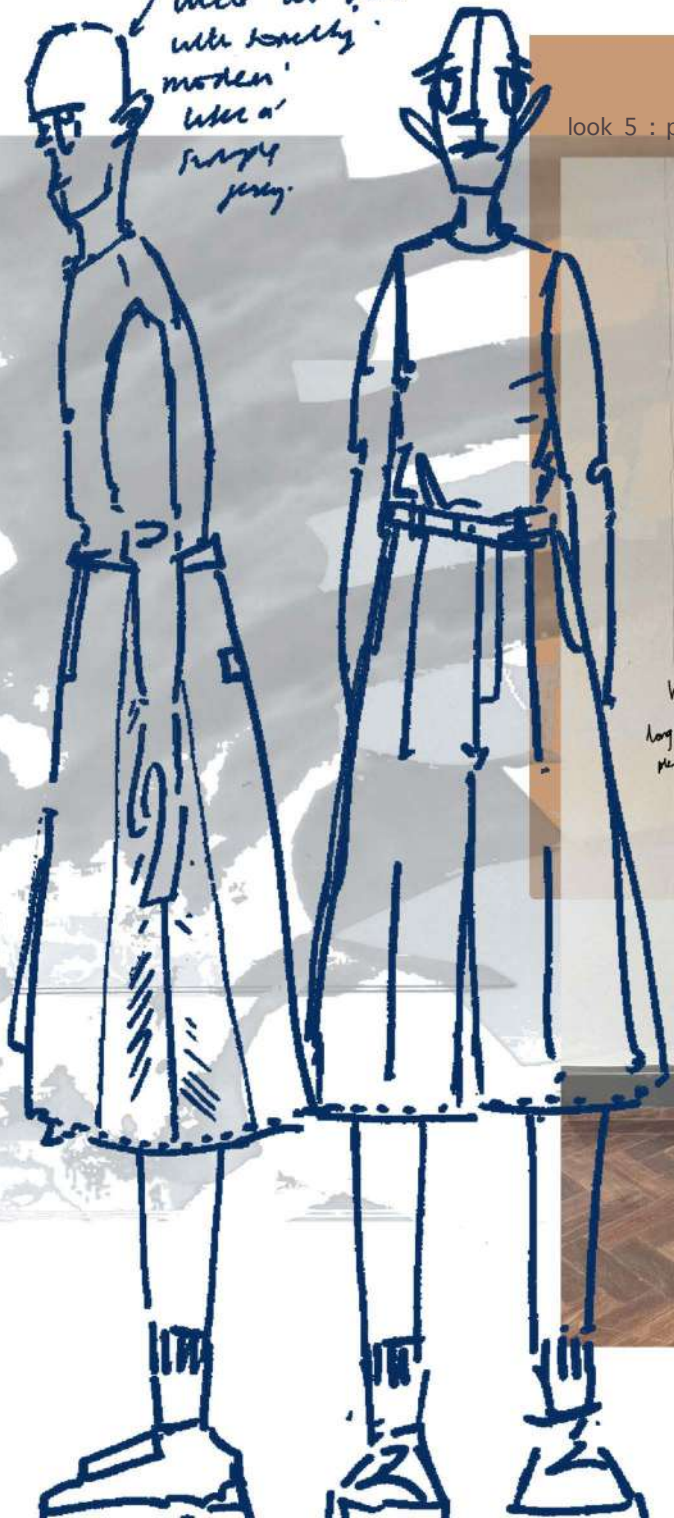

raw edges visible as a feature
